

ScaffSentinel

SCAFFOLD PROTECTION SOLUTION

SCAFFSENTINEL:

ULTIMATE PROTECTION ON EVERY LEVEL

Innovative security solutions for construction

Select Group's vision introduced technology to the manned guarding market. We've been innovating for over 25 years and boast market-leading technology. Our brand new Scaffold Security solution is our latest step forward.

Up to 15m Detection

When an intruder is detected within 15 metres of any sensor, the system will activate an alarm and trigger an alert.

Image Capture

When an alarm is triggered, ScaffSentinel takes up to 5 images of the event, confirming an intruder is on site to ensure rapid police response.

Piece of Mind: On Demand

With access to all deployed devices via an easy to use app, and the ability to request images on demand 24/7, give yourself piece of mind that your site is safe and protected.

Small but Sturdy

ScaffSentinel is robust and unobtrusive, so won't get in the way of your operations, whilst still ensuring the protection of your vital assets.

Scalable Deployment

With up to 10 attachable sensors and cameras per unit, ScaffSentinel can scale with your site, covering scaffolds both small and large. Multiple units can also be chained together, ensuring that your entire site is protected in a cost-effective way.

Going the Distance

With a range of up to 100m between the base unit and each of the cameras, we can cover a significant area of your site without the need for multiple devices, and keep it covered even as the site changes over time.
